About the Us

Our Goal

The PCGL builds upon Canadian-made foundational components and datasets and utilizes international standards to unify Canada's human genome sequencing efforts and sets out a federated data management system that respects limitations on the jurisdictional movement of human genetic data.

Access and Analysis

The PCGL facilitates seamless access to and analysis of genomes sequenced in Canada, propelling advancements in both genomic science and personalized medicine.

Equity, Diversity, and Inclusion

By capturing the Canadian genomic "variome," the PCGL champions equity, diversity, and inclusion, ensuring equitable access to genomic advances for all Canadians.

Improving Healthcare Delivery

Serving as a pivotal mechanism, the PCGL enhances the efficiency and precision of healthcare delivery, facilitating personalized treatments tailored to individual genetic profiles.

Positioning Canada Globally

By fostering collaboration and innovation, the PCGL positions Canada as a vanguard in international genomic research endeavours, providing means and opportunities to facilitate clinical trials

Logos

These are the approved Pan-Canadian Genome Library logos.
The primary logo should be your default choice.
You may choose to use the icon logo independently when legibility is a concern in smaller applications.

Icon Logo

Logo Usage: Backgrounds

The logo can be applied to a number of different backgrounds utilizing the full range of our colour palette. In the following pages we will outline some colour usage suggestions but when exploring designs simply try to adhere to good principals of maintaining legibility, sufficient contrast and leaving clear space around the logo in order to not degrade the silhouette.

Logo Usage: Clear Space

When possible, ensure the logo has sufficient clear space around it as illustrated to the right. Clear space ensures our logo will remain a focal point with clear legibility.

Logo Usage: Minimum Size

There are no hard rules for minimal size of the logo as each project has unique individual constraints. Use your best design judgement as to when the logo is too small for legibility and switch to using the icon logo for these smaller applications.

Accepted Logo Alterations

Because multiple portals will be available, special modified logos have been approved exclusively for portal branding purposes.

Using abbreviated PCGL logos paired with the portal name ensures:

- Clear identification of the portal a researcher is using
- Improved readability at small or reduced sizes
- Consistent branding across all platforms

To obtain an approved portal-specific logo, please contact the **Communications Administrator**.

Options in white:

Logo Usage: Do Nots

While the Pan-Canadian Genome Library logo is flexible, there are still alterations and applications that should be avoided.

The icon may be used independently. It can serve as an alternative to the primary logo in smaller applications. It may also be used as a stylistic element in design work, however, the colours should never be altered. White and black applications are acceptable.

X Do not stretch, skew or distort the logo

X Do not create unauthorized sub-brands or other identities

X Do not add any effects or heavy drop shadows to the logo

X Do not add decorative elements to the logo

X Do not increase or decrease the size of icon

X Do not change the orientation of the icon

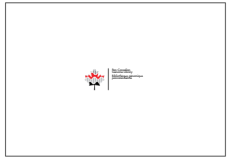

X Do not change the spacing of the icon

X Do not alter the colours

X Do not place the logo on a complicated or low contrast background

X Do not make the logo so small it becomes illegible

X Do not use pixelated or low resolution versions of the logo

✓ Please ask if you are not sure how the logo should be treated in a tough situation

Colours: Primary

These are our primary brand colours. In application these colours should be the most dominant and frequently used.

The primary colours can also be combined with the secondary palette in varying balances to achieve the look you need for your specific design.

Red
Hex: EC1C24
RGB: 236 28 36
CMYK: 1 99 97 0
PMS: 485 C

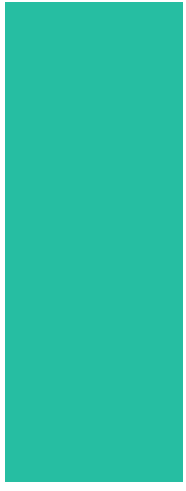

Cool Gray
Hex: 929497
RGB: 146,148, 151
CMYK: 45 36 35 1
PMS: 7 C

Pansy Purple
Hex: #761248
RGB: 118 18 72
CMYK: 44 100 45 31
PMS: 222 C

Deep Blue
Hex: #054A74
RGB: 5 74 116
CMYK: 96 36 0 55
PMS: 18-4434 TCX

Colours: Secondary

Our secondary colours are more flexible to give you a broad toolkit to fit a wide variety of moods in application.

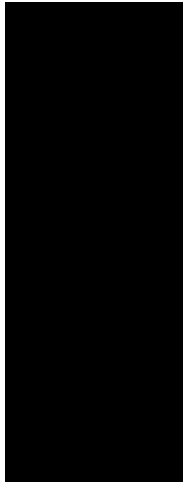

Light Sea Green
Hex: 25BEA2
RGB: 37 190 162
CMYK: 17 0 48 0
PMS: 2413 C

Steel Blue
Hex: 3D7EA5
RGB: 61 126 165
CMYK: 78 43 20 1
PMS: 2209 C

Dusty Rose
Hex: DFC7C5
RGB: 223 191 197
CMYK: 11 21 16 0
PMS: 5035 C

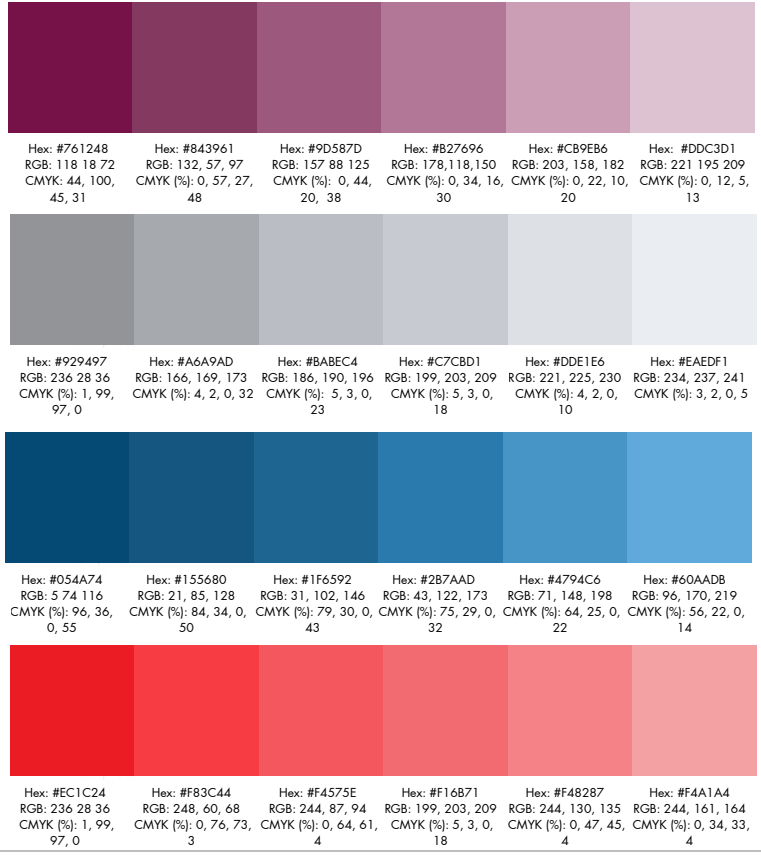

Black
Hex: 000000
RGB: 0 0 0
CMYK: 0 0 0 100
PMS: 319 C

Colours: Suggested Use

We recommend sticking to the colour treatments shown to the right.

These are just suggestions so use your best judgement when exploring outside of these styles.

Colours: Do Nots

There are many combinations of our colour palette that don't work.
These are a few examples of what you want to avoid when applying colour to your designs.

Typeface

Futura PT is a well-balanced, sans serif typeface. It can be accessed using Adobe Fonts.
In cases where Futura PT is either unavailable or unsuitable, appropriate substitutes are Work Sans and Jost available via fonts.google.com.
When writing documents that will be shared with the public, Jost should be used for Titles and headings, and Work Sans for the body of the text

Primary Font : Futura

Futura PT Light **Futura PT Book** **Futura PT Medium** *Futura PT Demi* **Futura PT Heavy** **Futura PT Bold** **Futura PT Extra Bold**
abcdefghijklmnopqrstuvwxyz
abcdefghijklmnopqrstuvwxyz

Secondary Font: Work Sans

Work Sans Regular *Works Sans Light* ***Work Sans Medium*** ***Work Sans Semi Bold*** ***Work Sans Bold*** ***Work Sans Extra Bold***
abcdefghijklmnopqrstuvwxyz

*Primary Font when Futura is unavailable: Jost

Jost Regular, Jost Light, **Jost Medium**, **Jost Semi Bold**, **Jost Bold**, **Jost Extra Bold**
abcdefghijklmnopqrstuvwxyz

Typography

The exact typographic hierarchy of your project or design will require your skill as a designer in setting up a coherent set of typographic styles that clearly demonstrate hierarchy. The example to the right demonstrates a clearly defined structure along with our most commonly used weights for each heading level. These are not "rules" but suggestions for setting up your own project.
All fonts kerning should be set to Optical, and tracking of 0.

Bold

Demi

Demi

Demi

Book

Book

Display Text

Heading 1

Heading 3

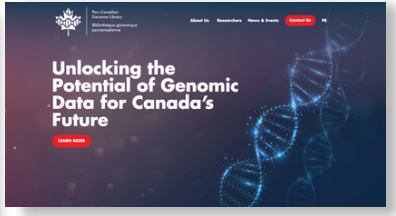

Heading 2

Excellent for large arrays of text, interesting enough to hold attention at large display sizes, and optimum for digital and printed performance.
